Jupiter - Coming Transit from Scorpio to Sagittarius

Everytime all the nine planets keeps on moving on their path (Rashi), every planet moves with his speed and completes the path in a fix duration of time, this duration depends on the speed of the planets, after finishing that path he changes the path and again keeps on moving on another . These paths are nothing but known as rashis , to whom we address by zodiac sign. Movement of these planets is called Transit. Coming days a major important change in planetary position is going to take place, I as a student of Astrology tried to understand and putting my notes for you all.

Same like all other planets Jupiter also completes his cycle and change the sign , this year he will be finishing his transit of scorpio (Vrishchik) and moving into Saggitarius (Dhanu). This transit will take place on Nov, 23rd 2007 for all most around 12 months. Jupiter (Guru) is the most satvik and benefic planet among the all nine planets, he is the lord of two major signs (Rashis) dhanu (Sagittarius) and Meena (Pisces) . Jupitar is the main karaka of 2nd , 5th 9th and 11th house of a General horoscope, 2nd house deals in wealth (Financial Position), 5th house deals in Child Birth and Knowledge (Growth) , 9th house deals in Fortune and Dharma (Future) and 11th house deals in Gains (Over all Gains) , Overall Jupiter is the controller or the Main karka for Growth , peace and overall prosperity, So Jupiter

is not only important in an individual's horoscope , but Jupiter's transit becomes very important for every individual, city, state , country or group of people. Being a planet of growth and prosperity its position (**Presence of Jupiter, its aspect on another planets and Another planets aspect on it**) plays very important role in understanding the overall economic condition.

To understand coming transit in better way we work on the last transit of Jupiter which was scorpio. Scorpio is martian sign , lorded by Mars , A Planet with energy , anger and too much aggression into it, or say planet with a hot nature. Scorpio being the sign of Mars has the same nature , Jupiter being a good friend of Mars became very comfortable (or say energetic) in scorpio, After entering into the friend's sign Jupiter became more comfortable and energetic and started producing its results, as stated earlier Jupiter being a planet of growth, financial prosperity and money showered his blessings on financial sector , we don't need any example , only sensex is enough to watch.

Mars mainly rules on the Land and property in astrology so when Jupiter came into the friends house he showered his blessings in that area also and we can easily see the growth in property and real estate, its not in a particular city, we all can see growth in all the areas , rather say it's a wave of growth and everybody and every area has to flow the wave.

Lets discuss something about the Dhanu (Sagittarius) sign, This is a first owned house of Jupiter , in astrological term it is known as mooltrikon house of Jupiter , in layman's language 2nd important house or sign after Cancer/Karka where Jupiter becomes more comfortable. As I understand people with jupiterian Lagna (Dhanu/Sagittarius) will feel very comfortable and will enjoy the blessings of jupiter. Prosperity and Growth will flow everywhere , in every sector, Initial 4 months Jupiter will be directly opposite to his friend Mars and will aspected by him, so surely he will work in most energetic mood, People related to stock market be assured sensex will boom like anything (**be alter during the retro motion of Mars**), People related dharma , or Political Parties with agenda of Dharma /religion with benefited.

So Friends enjoy the blessings of Jupiter coming year and work hard to achieve more and more goals. People with strong Jupiter in the chart will be more beneficial, and natives who have weak Jupiter or Jupiter is in curse (Shaapit) shud consult their astrologers and work something for removal of dosha to get more and more milage of coming transit. People with Guru+Rahu combination may also suffer in some areas.

Pls. find here rashi (Moon sign) wise general effects on individuals. This effects can differ native to native , which depends on other planetary position in individual's horoscope.
