Birth Time Rectification

What is Birth time rectification ?

Friends, being an Indian we all have faith in good karma, our mythology and ancient gifts like astrology. Before happening of any event like marriages first we have tradition of getting kundlis (birth charts) matched or fixing up the right muhurtha for doing the work, when we are such devotees towards our tradition why don't we work logically or think scientifically on those matters as we are in modern age. Very few of us must be knowing that the science gifted by our sagas called astrology is so strong where we can find out a right birth time, which even doctor or parents also don't because they don't have command over the watches, infact thousands years ago while researching over jyotisha those maharshis kept this thing in mind that parents can forget noting the right time or clock may also give wrong time (in general every clock u see will show a different time), this can be a small error but impact of this can give wrong judgement while studing a horoscope, Infact we always take it so casual.

Why We need rectification ?

A Horoscope is compiled or casted with birth data of the native or on the time of happening of any event, Planetary position of that time on particular longitude and latitude in different sign (zodiac or rasis, which are nothing but the path of planets on which planets always keep moving) is placed in a horoscope. Different planets take different time to complete their movement in a sign, for example Saturn takes two and half years and Jupiter takes one year, Moon completes approximately in one day and Sun takes a month to finish it. Lagna / Ascendant or 1st house of the horoscope changes in every two hours. A distance passed by a planet or lagna in a particular sign is counted in degrees, that keeps changing in every fraction of time, complete zodiac is of 360 degrees and one rasi of that zodiac is $(360/12 \text{ rasi} =)$ 30 degrees so every planet has to travel 30 degrees in his tenure.

So as per basic or general knowledge minimum travel time of lagna is 2 hours, so if one prepares a horoscope with minor difference in birth time that will not affect the rasi kundli (main kundli). Let's take an example, suppose lagna is changed from Cancer to Leo on 1 pm so next lagna will be changed on 3 pm means there should not be any difference in horoscope prepared by taking time of 1.30 or 2.00 pm? because Moon will also be in the same rasi and other planets have to remain there for a long time. If this is so then why there are not so many Amitabhs, Shahruks or Rahul Gandhis, because in the duration of those two hours there would be several kids who might have taken birth.

In Indian systems difference of 4-5 mins in our clocks is very common thing even in old days time difference of 1-10 mins in different clocks was very normal things.

Our maharshis have given us minimum 64 kinds of divisional charts which are prepared on basis of the birth data given by the native, 1st rasi chart lagna takes two hours in getting changed, Hora chart which is used to judge the financial position is prepared

by dividing the rasi chakra into 2 parts by a special method takes 1 hr in changing , most important chat navmansa is 1/9th div. of rasi means it takes (120 mins. / 9 (9th Div.) =) 13 mins. , dasmansa takes 12 mins, so last chart takes only 24 secs. in getting changed , Every chart plays a very important role in deciding his luck in related area of life, Suppose a person has sun in neecha (negative) position in main kundli and in navmansa the same goes in uchha (positive) , this is called cancellation of 'neecha' and he will enjoy its positive points, but somany respected astrologer puts up their comments without judging navmansa chart and decides his/her destiny,

One more thing can be there so many natives takes birth on the cusp, junction of lagna , suppose birth time in 12:10pm and Lagna was in its last degrees so it is difficult to decide in which lagna native has taken birth, in that condition also rectification of time is required. I have across with somany natives who were not manglik but 20 years old manually made kundli was showing native as manglik when we went thru proper examination of chart we found native is non-manlik , lets think how big mistakes we can do ?

so an intelligent astrologer's first job is to recitify the time for right predictions and then decrbe his predictions. Normaly traditional astrologers ignores this topic due to lake of knowledge in judging and recitifying the divisional charts.

Friends interested in study and knowledge of jyotish can rise discussion points which will surely update knowledge of ours.
