Example of Study on Progency Matter

After bounding in relationship of marriage every couple wish to see their coming generation , As like the other factors peace of children also depends on one's luck, When she will get conceive , deliver the baby, child will be male or female, or even couple has children in their luck or not, and all other negative and positive factors of the particular area depends on the planetary placements of one's birth horoscope.

Lagna kundli or or main horoscope is not the final say in this subject, one needs to have indepth study of D-7 (Saptmansa) chart for the knowing the ins and outs of this area. D-7 is nothing but one of the divisional chart who keeps control on one's progency area , this is prepared by the 1/7 fraction of Lagna kundli and planetary position of the same .

Before proceeding for final study of the on this subject study a list of combination swchich keeps control over this area and gives u all indications and proper hints for further remedial measures if anything is wrong.

Guru - Guru is responsible planet for giving a peace of son or children to the native, a native with well placed and strong Jupiter bounds timely in marriage and gets the peace of children by the blessings of Jupiter. So first of all placement and position of the Jupiter should be checked the chart.

Moon - Moon is similar important as guru in females chart , as he is responsible for giving peace of motherhood to the female native, moon is significator of organs

responsible for conceiving a female. He keeps control over the watery element of the body, being a female planet he indicates towards female child. Any problem with the moon (his association with 6/8/12 lords or melafic aspect on him) indicates medical unfitness to the female native.

Ninth house – As 9th house is considered one of the strong pillars of the chart and tells about one's future, study of this house is also considered very important to see the future generation, that's why 9th house from the UL (upapada lagna, who represents spouse) and lagna and their lords should be checked properly to examine the peace of children.

Fifth house – Fifth house of the chart directly represents children, and in females chart this is also checked up for system (organs) for giving pregnancy and delivery of a child. This is also the house of 'purva punya', shows of the deeds of the past birth, too much affliction on this house destroys that area.

Mercury – Budh or mercury is an enouch planet his position in chart also indicates towards the denial of children, even same is the case with the Saturn, if any of them or both are placed in lagna of saptmansa chart then this combination denies the children permanently.

Mangal – Nature of this planet is considered very aggressive and hot, he rules over the blood and gives cuts and boils, any accidental case of miscarriage or surgical delivery is needed to be linked with the Mars / Mangal. His aspect or presence on 5th house or with moon in female chart indicates towards surgical delivery or even miscarriage if more melafic aspects are there.

Sun – Giver of light to world and making every living thing alive, sun represents soul and responsible to give light of life in seeds of male, placement and position of sun indicates towards the strength of seeds to be fertile. So strong sun in males chart and strong moon in females chart is important for a successful pregnancy.

Rahu – Inimical planet towards sun and moon, his aspects and combination with them destroys the possibilities of conceiving. As he belongs to the shocks and threats, plays a very negative role for successful deliveries, although a strong Rahu gives male child.

Venus – Venus is the significator for sperms and a female planet of watery element (Jal tatva), he represents female child. Some combinations of venus are considered harm full for successful pregnancy.

Arudha (image) of 3rd and 9th house from the sun and lagna (known as A3, A9, AS3 and AS9) shows the capability to procreate, Placement of sun in 2nd , 6th , 8th or 12th house from this indicate towards the inability to procreate, if this is from arudha of sun then medical treatment is required otherwise from lagna this indicates towards lake of jeeva (soul) in seeds.

Navmansa chart also carries equal importance as saptamansa and lagna chart for study of progency matter. Planets responsible for affecting progency area also needed to check in navmansa chart.

Still a huge list of combination is there to describe but to make the paper short and easy to understand I will describe them in examples itself.

Example - I
(Surgical delivery)
Lagna Kundli

```

*****
* *          MOON          * *          * *
* *          MARS 4      * *          LAGN      * *          3 * *
* 5          *          * *          3          * *          *
* *          *          *          *          *          *
* SHANI          *          GURU - R          *          *
* *          *          *          *          *          *
* *          *          *          *          *          1 *
* *          SHUKRA          *          *          KETU          * *
* *          RAHU 6          *          *          *          * *
* *          *          *          *          12          *
* *          *          *          *          *          * *
* *          *          *          *          *          *
* *          *          *          *          *          *
* 7 SURYA          *          9          *          11 *
* BUDH          * 8          *          *          *          *
* *          *          *          *          *          *
* *          *          *          *          10          * *
* *          *          *          *          *          *
*****

```

Fifth house of the above mentioned chart is being aspected by so many planets, Guru from the lagna , Saturn from the 3rd house and surya and mercury are already placed there, All the planets connected to it are male planets so birth of a male child was sure to occur. Placement of mars with the moon and aspect of mars on 5th house could give prematured delivery but due to blessings of Jupiter from the lagna things were alright till successful delivery, but at last aspect of mars on 5th house and moon created the position of surgery and proven his wild nature.

Example - II
(Birth of female Child)
Lagna Kundli of male native

```

Fifth house has placement of strong mars and 5th house lord Saturn in 8th house under aspect of mars is clearly indicating storn chances of miscarriages and surgical deliveries (moon also placed in 6th house). Guru is weak in navmansa so things were serious in term of progency matter. Saptmansa chart has scorpio lagna which is an even sign so as per the

rule 9th house of chart needs to be studied for 1st pregnancy , sun is placed there and lord of same moon is placed in male sign in 4th house , as this house is aspected by rahu so conditions of survival of this pregnancy was very low but due to blessings of Jupiter (Jupiter is aspecting from 12th to moon) she given birth to a male child. Next pregnancy is 3rd from 9th house (reverse counting) means taurus , lord of which shukra is placed in 3rd house , which is aspected by mars from 8th house (8th aspect) and conjoined by Saturn , this all resulted loss of pregnancy,. Next pregnancy is again 3rd from that house , again reverse calculation , 5th house , lord of which is Jupiter placed in 12th house (losses) conjoined by the rahu and aspected by the Saturn which given loss to this pregnancy. At last native again tried for a child , this time pregnancy was represented by the 3rd house (reverse calculation from 3rd from 5th house) , this is conjoined by the Saturn and aspected by the mars, again mars proven his cruelty and hot nature , which resulted failed try for native.

Santan Gopal mantra and pooja of balrupa of Krishna is considered auspicious and giver of peace of children.
